MQTTX CLI supports Windows, macOS, and Linux. You can install MQTTX CLI in the following ways:

1. Quick installation using [command line](#) [download binaries](#)
2. Install with [Docker](#)
3. Using [NPM](#)
4. Alternative, you can download and install manually from the [MQTTX CLI homepage](#) or from [GitHub](#)

If you encounter network issues that cause slow or stuck downloads from GitHub, we recommend that you download and install from [MQTTX CLI homepage](#).

If you need to download and use more released versions, you can also check out [More Downloads](#), choose the version that meets your needs, and install it.

**Note:** When downloading, pay attention to distinguish the CPU architecture of the current system environment, and try to choose the latest version to download.

## [macOS](#)

### [Homebrew](#)

```
brew install emqx/mqttx/mqttx-cli
```

### [Intel Chip](#)

```
curl -LO https://www.emqx.com/zh/downloads/MQTTX/${version}/mqttx-cli-macos-x64
sudo install ./mqttx-cli-macos-x64 /usr/local/bin/mqttx
```

### [Apple Silicon](#)

```
curl -LO https://www.emqx.com/zh/downloads/MQTTX/${version}/mqttx-cli-macos-arm64
sudo install ./mqttx-cli-macos-arm64 /usr/local/bin/mqttx
```

## **Linux**

### **x86-64**

```
curl -LO https://www.emqx.com/zh/downloads/MQTTX/${version}/mqttx-cli-linux-x64
sudo install ./mqttx-cli-linux-x64 /usr/local/bin/mqttx
```

### **ARM64**

```
curl -LO https://www.emqx.com/zh/downloads/MQTTX/${version}/mqttx-cli-linux-arm64
sudo install ./mqttx-cli-linux-arm64 /usr/local/bin/mqttx
```

## **Windows**

For Windows users, please go to the [MQTTX CLI home page](#) or [GitHub](#) and find the exe package for the corresponding system architecture, download it manually and use it.

Note: When using commands that require input string data, please be aware to use double quotes in Windows cmd, while single quotes can be used in PowerShell. Additionally, the paths use \ while in other operating systems they use / .

## **Docker**

```
docker pull emqx/mqttx-cli

docker run -it --rm emqx/mqttx-cli
```

## **NPM**

```
npm install mqttx-cli -g
```

## **Other platforms**

Download packaged binaries from the MQTTX [releases page](#).

## **Verify installation**

After installation, you can verify that the installation is successful by running the following command:

```
mqttx -v
```
